PROFESSIONAL & TECHNICAL SERVICES

If you enjoy working with computers in a professional business organization, then Professional & Technical Services may be for you.

Computer User Support Specialist

Provide technical assistance to computer system users. Answer questions or resolve computer problems for clients in person, via telephone or from remote location.

Lawyer

Represent clients in criminal and civil litigation and other legal proceedings, draw up legal documents, and manage or advise clients on legal transactions. May specialize in a single area or may practice broadly in many areas of law.

Management Analyst

Conduct organizational studies and evaluations, design systems and procedures, conduct work simplifications and measurement studies, and prepare operations and procedures manuals to assist management in operating more efficiently and effectively.

Software Developers, Applications

Develop, create, and modify general computer applications software or specialized utility programs. Analyze user needs and develop software solutions.

Civil Engineer

Apply theory and principles of civil engineering in planning, designing, and overseeing construction and maintenance of structures and facilities under the direction of engineering staff or physical scientists.

Environmental Scientist

Conduct research or perform investigation for the purpose of identifying, abating, or eliminating sources of pollutants or hazards that affect either the environment or the health of the population.

Computer Systems Analysts

Analyze science, engineering, business, and other data processing problems to implement and improve computer systems.

Accountant and Auditor

Ensure that firms are run efficiently, public records kept accurately, and taxes paid properly and on time.

Graphic Designer

Design or create graphics to meet specific commercial or promotional needs, such as packaging, displays, or logos.
